promastigote surface antigen P2 (clone 4.6) precursor - Leishmania major (fragment)
C.Species: Leishmania major
C.Species: Leishmania surface antigen derived from a multigenic family.
J. Biol. Chem. 266, 24477-24484, 1991
A.Title: Variants of a Leishmania surface antigen derived from a multigenic family.
A.Reference number: A41710; MUID:92105105; PMID:1761547
A.Reference number: A41710; MUID:92105105; PMID:1761547
A.Residues: L-327 - AMURA
A.Residues: Diocked carboxyl end; glycoprotein; lipoprotein; phosphatidylinositol linkage
F;1-299/Product: promastigote surface antigen P2 (fragment) #status predicted -RPSA>
F;300-327/Domain: carboxyl-terminal propeptide #status predicted -CTP>
F;299/Modified site: GPI-anchor ethanolamine amidated carboxyl end (Asp) (in mature form).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Apportetical protein EEED8.11 - Caenorhabditis elegans
C.Species: Caenorhabditis

merozoice surface antigen - malaria parasite (Plasmodium falciparum)
C;Species: Plasmodium falciparum
C;Species: Plasmodium
C;Species: S3310
R;Ramasamy, R.; Ranasinghe, C.
submitted to the RMIL Data Library, November 1993
A;Description: Cycle ds DNA sequencing of a malaria parasite protein from infected blood
A;Description: S39310
A;Reference number: S39310
A;Status: preliminary
A;Residues: 1-278 «RAM»
A;Residues: 1-278 «RAM»
A;Residues: 1-278 «RAM»
A;Residues: 1-278 «RAM»
C;Superfamily: Epstein-Barr Virus nuclear antigen
C;Superfamily: Epstein-Barr Virus nuclear antigen
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      merozoite surface antigen 2 - malaria parasite (Plasmodium falciparum)
C.Species: Plasmodium falciparum
C.Date: 22-Apr-1993 #sequence_revision 18-Nov-1994 #text_change 09-Jul-2004
C.Accession: A45632
A.Fitle: Two novel alleles within subfamilies of the merozoite surface antigen 2 (MSA-2)
